Dear Sir / Madam,

ADITI (Association of Dental Industry and Trade of India) is committed to organizing Expodents, the mega event held at least 6 times a year in different parts of our country bringing together members of various branches of dentistry - Dental Specialists, Practitioners, Technicians, Students and Manufacturers & Distributors of Clinical as well as Laboratory Dental Equipments, Instruments and other Materials.

Encouraged by the success of earlier Expodents and keeping in line with the objectives of ADITI, Expodent 2020, Chennai is to be organized on the 28th and 29th March, 2020 at Chennai Trade Centre by ADITI South Zone.

Since South India is now home to a large number of speciality dentists, dental clinics and hospitals offering the best range of services to the increasing demand, as a result of wider awareness in Dental Health; Expodent 2020, Chennai would see a confluence of enthusiastic members of the entire Dental Fraternity and of eminent experts in the Industry & Trade. It will also serve as a platform for professionals and students to learn new technologies and innovations in this specialized field.

Thus, Expodent 2020, Chennai is expected to be one of the greatest shows in India in 2020 successfully tapping the useful and knowledgeable resources in Dental Industry. We request all of you to participate in this knowledge confluence and make it a grand success.

Please do write to us if you have any suggestions or queries.

Thanking you, in anticipation.

MEGA EVENT *focussing on*
NEW INNOVATIONS
& TECHNOLOGY
in the field of Dentistry

Largest Dental Exhibition in South India

HIGHLIGHTS

- More than 400 stalls
- Footfall in 2019 was more than 10000 visitors
- Total trade area of 7000 sq.mtrs.
- Ample car parking space
- CCTV camera surveillance
- Banking / Courier facility inside the Venue.

More Participants More Knowledge Sharing.

made in U.K.

PulpEst is reliable assistant for the assessment of pulp health based on its qualitative sensory response.
— prior to restorative, endodontic, and orthodontic procedures,
— as a follow-up and for monitoring the pulp after trauma to the teeth,
— in differential diagnoses, such as excluding periapical pathosis of pulp origin.

PulpEst is a hand-held, battery-powered dental diagnostic device intended to be used as a diagnostic instrument to assist in the determination of the vitality of the dental pulp by stimulating it with a weak electric current.

The range of 'diagnostic' currents — from 0 to 80 mcA

Features and benefits:

Designed for optimal ergonomics and easy handling

Quick-detachable sterilizable tip-probe;

LCD-display with all the chosen settings;

10 levels of rate of rise of «diagnostic» currents;

20 hours of continuous operation without recharging the battery;

Low weight and overall dimensions.
