RAJINDER KUMAR MATHUR
Chairman
Expodent International India

It is with great pleasure that, we on behalf of ADITI welcome you at **EXPONENT INTERNATIONAL INDIA - 2019** New Delhi.

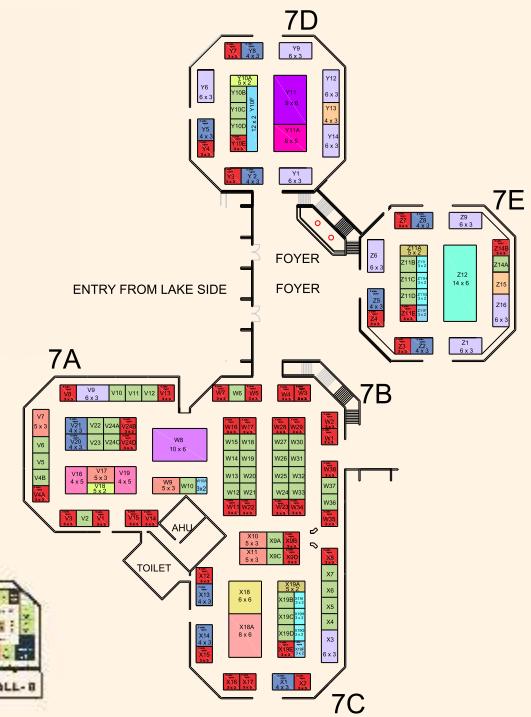

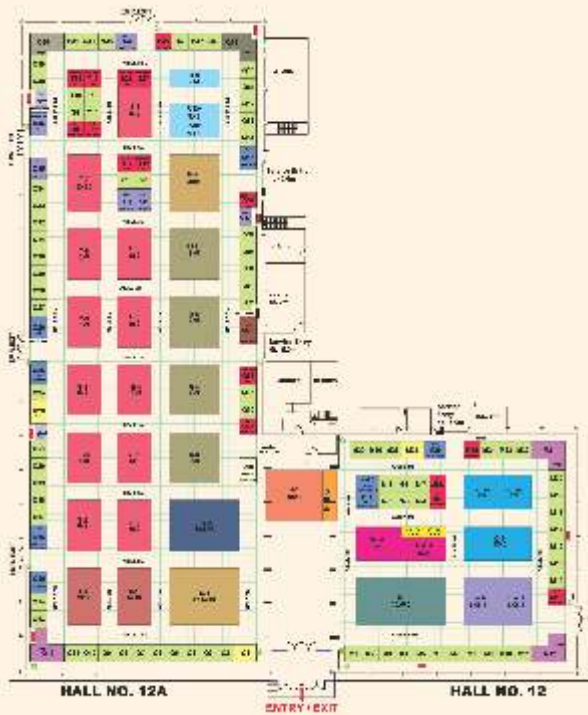

As in all the previous years, we bring you the latest developments in the field of Dentistry as regards Dental equipments, materials, consumables and systems that reflect the global trends in this vast science. To reiterate what we have been professing all along, it is our firm belief that constant upgradation in knowledge, thus 'reinventing' of ourselves is what defines our standing in our chosen field of endeavour. Towards this, **EXPONENT INTERNATIONAL INDIA 2019** is our contribution, to be experienced and partaken of by all who are involved in the field of dentistry and allied sciences.

Please attend the **EXPONENT INTERNATIONAL INDIA 2019**, see the latest in Dental technology and experience for yourselves the current trends in this field. We look forward to welcome you soon at Pragati Maidan 2019.

Thanks

Blu-lux

Blu-Lux is a light curing unit used for curing light curing trays for the fabrication of custom impression trays. It is also used for post curing of 3D printed resins and light curing pattern resins.

Xtend Trays

Edentulous Impression Trays

Tray Contour for Atrophied Ridge

Tray Contour for Average Ridge

Sublingual arc

Mentalis knob

Massetric Cut

Xtend trays™ are impression trays for making primary impressions in an edentulous jaw. They are designed to follow the ridge anatomy to capture the important landmarks. Xtend trays are used with dual consistency Alginate (tray and syringe consistency) for a good impression. These trays are autoclavable at 121°C.

The Future of Occlusion Control

Now Available in INDIA

Our vision and challenge was to combine the traditional and digital presentation of the masticatory forces on occlusal surfaces. Our new product OccluSense has made this vision come true.

The various components of the OccluSense system consisting of the handheld device, inductive charger, a test sensor and 1 box of 25 OccluSense sensors come in a convenient suitcase.

Handheld :

The masticatory forces are captured by the sensor and recorded by the handheld device which transmits the recorded data wireless to the OccluSense-iPad-App.

Inductive Charger :

The inductive charger provides wireless power transfer. Fully charged batteries allow the usage of the device for up to 4 hours.

Ergonomic Design :

Two operating buttons for intuitive handling.

Simply. Wireless :

Compatible with your local wireless network. Use the mobile system anywhere in your dental office.

Test Sensor :

The included test sensor ensures that the OccluSense system is working correctly.
